Subject: Question on History of CCS in North Dakota

Hi Kevin,

In preparing for the briefing with our Office Director (Peter Grevatt), a question came up on when North Dakota first had legislation to create a CCS program. I believe North Dakota already had statutes and/or regulations for CCS activities prior to the Class VI (GS Rule) was published in 2010. This will just provide background information and show that ND has been thinking about permitting GS activities for however many years. Will help us show that this primacy rule is important and have the rules signed hopefully more quickly.

Thanks,

Lisa
